Hi Ali, at this point the MAs were set up as the backup plan if the current contracted lab can't fulfill the 24hr TAT for the Animas samples. The spill response team will likely send samples to the CLP in a few weeks after the Region gets the critical samples analyzed that require the 24hr TAT.

Thanks, Don

Subject: Region 08 | New MAs

Hi Don,

Does the Region have a plan for shipping the samples to the CLP labs? If you do not have a plan for how many samples will be shipping per day, we can add language that the laboratory should close the SDGs daily.

Thanks,
